

**PRESS RELEASE – November 2008**

*For immediate release in news section*

**Q's Latest James Bond Gadget – 007 Stunts Use the CG-Lock Device.**

The CG-Lock has been proven to improve both lap times on the track and posture on the roads. This clever little device has also been used for several major blockbuster movies, including the latest from 007 "Quantum of Solace".

"The devices were very useful for some of the challenging driving sequences and you'll see why when you see the movie!" said Ben Collins, one of the main stunt coordinators and top racing driver.

This 007 gadget is available to the general public giving you the same improved control, comfort and safety in your vehicle on the roads and guaranteed better lap times on the track.

The Top Gear Live shows are again using the device for the stage show stunts.

The CG-Lock clips on to your existing seatbelt, keeping you secure during demanding manoeuvres on track days and also prevents you from slipping into the poor posture that usually causes lower back pain and fatigue when driving on the roads.

It takes seconds to fit and can be easily transferred from one vehicle to another, making it a car 'essential' at under £50 (with full money back guarantee\*).

Order yours on the 24/7 sales hotline 08701 245 625 or visit the website [www.cg-lock.co.uk](http://www.cg-lock.co.uk) for more information.
