

## MIDGE'S FESTER

Glass – it's wicked when filled with beer, but not so good on the fast lane of the M25. Yes peeps, FC nearly lost a consumer writer and an editorial assistant in one go this month. As the Faliraki monkey boy and myself were twatting it back from a cruise at 5am one morning in my Mk3 Si. I awoke to find one shredded tyre and my car hanging out of a bush.

It turns out Tony had driven through some glass and it was instant blowout central for my two front tyres. Hopefully they'll be sorted next month.

With Gez cracking the whip at the office and my missus cracking it at home (you jammy bastard – Slim Jules), I haven't had a lot of time for any major mods to my Zetec-S this month. However, the boys at Auto Graphx in Rotherham did manage to sort out some proper rally slag-style decals for me motor though.

Their vinyl graphics are top quality, easy to fit and are gonna let everyone know

exactly who's kicking Fat Head's arse at USC.

I've also managed to get hold of a CG-Lock for my little Ford. This baby is a piece of piss to fit and works by locking down the seatbelt, effectively turning it into a harness. It can be turned on to keep you safe when you're giving it the berries round the twisty stuff and simply switched off for normal driving. It's ideal for people who don't want the hassle of full harnesses and, at a mere £45, a real pocket money mod. My Colin McRae impressions have never been better and I might even get one for the missus. At least it'll stop her moaning about banging her cranium on my tinted window.

### CONTACTS...

Dean @ CG Lock – 07812  
245625, [www.cg-lock.co.uk](http://www.cg-lock.co.uk)  
Tony @ Auto Graphx –  
05709 370004

*We have only just realized that Midge is a bit of a helmet.*
